

WEATHER APP

(App development using React Native)

MINI PROJECT-2 SYNOPSIS

Department of Computer Engineering and Application
Institute of Engineering and Technology

Submitted To :-

Mr. Mandeep Singh

(Assistant Professor)

Submitted By :-

Gaurav Srivastava (191500294)

Siddharth Vikram Singh(181500711)

Acknowledgement

The satisfaction that accompanies the successful completion of this project would be incomplete without the mention of the people who made it possible, without whose constant guidance and encouragement would have made efforts go in vain. I consider myself privileged to express gratitude and respect towards all those who guided us through the completion of this project. I convey thanks to my project guide **Mr Mandeep Singh** of Computer Science and Engineering Department for providing encouragement, constant support and guidance which was of a great help to complete this project successfully.

Last but not the least, we wish to thank our parents for financing our studies in this college as well as for constantly encouraging us to learn engineering. Their personal sacrifice in providing this opportunity to learn engineering is gratefully acknowledged.

INTRODUCTION

Weather App is an android application made to facilitate users with has a solution so that user are able to fetch live weather update. Whether you're looking to fetch weather data when you are going to office or to fetch another city data by sitting at home, This app would be better for that. This application is designed to help you to acknowledge better with live weather forecast. It is a hassle- free and pinpoint accurate platform with retrieving information of each and everything related to basic weather application, including live weather of the required city using React Native and Weather API. To check temperature, wind speed, humidity and weather of required location. We also provide background suited for respective weather conditions.

The main goal of the service is to develop a Live Weather Forecast Expo App which provide live weather of the required city using React Native and Weather api. To check temperature, wind speed, humidity and weather of required location.

This software is provided as an online only resource so that it may be continually extended and updated.

REQUIREMENT ANALYSIS

HARDWARE REQUIREMENT:

- 4 GB RAM
- 128 GB HARD DISK
- Processor core i3 (7th generation)
- Computer device, Mobile (To check the working of our application)

SOFTWARE REQUIREMENTS:

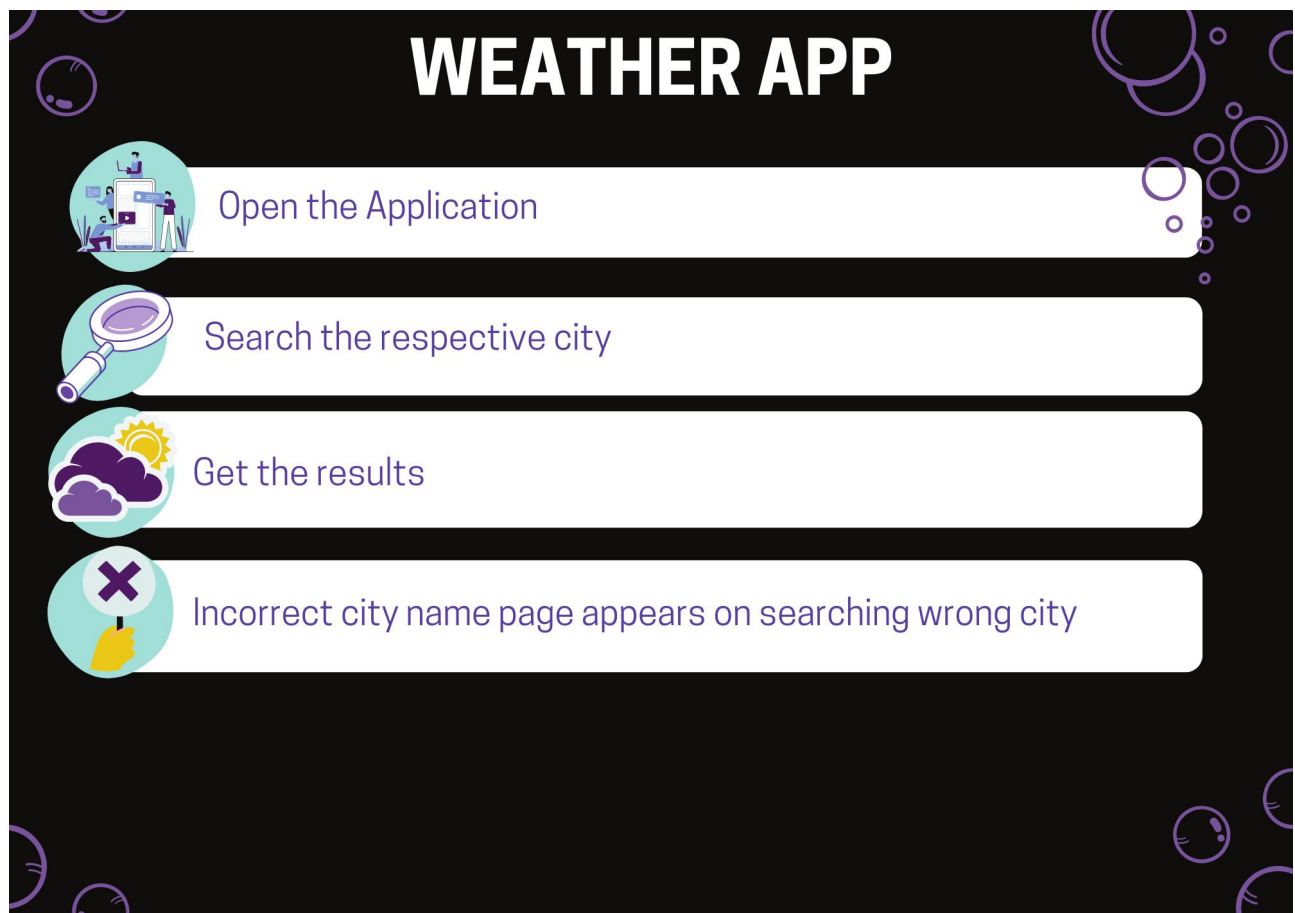

- Windows 7 or above
- Expo App

LANGUAGES AND TOOLS USED:

- VS CODE
- React Native(framework)

BASIC IDEAS

Our app start with default screen which shows by default city current weather forecast,after that it will show desired city weather forecast which contains complete status about weather forecast including live weather of the required city using React Native and Weather API. To check temperature, wind speed, humidity and weather of required location.
